SureColor SC-F11000H

DATASHEET / BROCHURE

KEY FEATURES

- **High productivity**
  Improve efficiency and lower costs
- **Extend the colour gamut**
  Fluorescent Yellow/Pink, Light Cyan/ Magenta or Orange/Violet inks
- **Minimised downtime**
  Optional jumbo roll enables continuous production and reduced downtime[1]
- **Colour constancy**
  Accurate colour reproduction, reduced graininess and smooth gradation

SureColor SC-F11000H

Best for textile producers and promotional goods makers who need high-quality dye sublimation output.

Enjoy repeatable quality as Epson manufactures all the components for the SC-F11000H, including printheads, inks and software. Further support is delivered through EMX files, along with Epson media, to provide correct colour profiles and machine settings. The optional Jumbo Roll enables continuous production and reduced downtime due to less frequent media changes.

Trusted reliability.

The robust, industrial build quality helps to produce high-quality output. The printer's reliability is enhanced by Advanced Auto Tension Control (Ad-ATC) for accurate and stable media feeding even on thin media auto-adjustment technology, and supporting software that allows users to monitor printer performance, even remotely. High productivity.

Every component has been designed to enhance the user experience, help increase output, improve efficiency and lower costs. User productivity is improved, thanks to the bulk ink solution (3 and 10-litre ink boxes) and a 'hot-swap' ink changeover function. It also incorporates operator-replaceable parts to increase uptime and improve productivity.

Speed.

The PrecisionCore MicroTFP printhead and a highly efficient dryer allow the SC-F11000H to print up to 255m²/hr, combining quality with high speed printing.

Epson Precision Dot Technology.

The flexibility of output allows for a diverse range of applications (fashion, sports, home textiles & soft signage).
