SureColor SC-F9500

DATASHEET / BROCHURE

SureColor SC-F9500

Best for textile producers and promotional goods makers who need high-quality 64-inch dye sublimation output.

Ideal for applications from sportswear and soft signage, to home décor and fashion, this latest addition to Epson's industry-leading range of 64-inch dye-sublimation printers offers even higher levels of quality, versatility and productivity than its highly popular predecessor. Built around Epson's unique PrecisionCore technology, the 4-colour (CMYK) SC-F9500 also includes features such as Automatic Nozzle Detection, with high and low pass modes, to optimise output quality and consistency by adjusting nozzle conditions during the printing process, while anyone looking to benefit from an even wider colour gamut has the option of its 6-colour variant, the SC-F9500H. The SC-F9500 is great for productivity too. With an increased (2.64-inch) printhead bandwidth that helps to reduce turnaround time, it also features 1.6L hot-swappable ink packs, which reduce downtime and simplify replacement, while the printer's highly compact, low-profile design makes it ideal for use in space-restricted areas, and its flat-top design creates an additional workspace for devices such as a laptop. What's more, the SC-F9500's large (4.3-inch) touchscreen enables easy and intuitive operation, while the need for a service engineer can be eliminated by registering with the Epson Cloud Solution PORT. The SC-F9500 is also compatible with all major third-party software.

KEY FEATURES

- **Customisable textile printing**
  Versatile application, including sportswear, soft signage and fashion
- **Outstanding image quality**
  Epson PrecisionCore technology plus advanced colour control
- **Improved productivity**
  Wider (2.64-inch) printhead, hot-swappable ink packs, reduced downtime
- **Versatile and easy to use**
  Highly compact, flat-top design with intuitive 4.3" touchscreen
- **Advanced support**
  Supports remote management through Epson Cloud Solution PORT
