SureColor V7000

DATASHEET / BROCHURE

KEY FEATURES

- **Outstanding print quality**
  UltraChrome UV 10-colour inkset
- **High speed printing**
  Simultaneous printing even when using white, colour and varnish
- **Maximum print size**
  2.5m x 1.25m
- **Wide range of media**
  To expand product offering potential
- **The complete Epson solution**
  Including printheads, ink, firmware and software

SureColor V7000

Best for sign makers and promotional producers who need direct-to-object UV printing on rigid and flexible media.

High-quality prints.

This UV flatbed printer delivers outstanding print quality and vivid colours, as the UltraChrome UV 10-colour inkset enhances prints for stunning results. The white ink provides versatility for printing on a wider range of products – either applied as a base layer on coloured media, or to create versatile backlit prints. Similarly, the varnish offers flexibility, as it can be applied all over the image or as a spot colour to accentuate specific textures and effects.

Productivity.

The SC-V7000 enables businesses to print at high speed with a maximum print area of 2.5 metres by 1.25 metres. The printhead layout enables simultaneous high-speed printing, with white ink and varnish, without losing productivity.

Material versatility.

Users can print onto a wide range of substrates up to 80mm thick including: acrylics, polycarbonates, PVC, glass, aluminium, metal, polyester, foamboard, styrene, wood and stone. And with the 4-zone vacuum system, it offers real flexibility for production environments.

Usability.

The printer automatically adjusts the printhead height depending on the mediathickness and also includes a crash sensor to avoid potential head crashes. Theionizer helps eliminate and reduce the static charge on the media so that inkdrops are not deflected, but land in the correct place, meaning that print quality isconsistently maintained.
