

Produce high volumes of superior-quality textiles quickly and consistently while keeping costs low

{bAchieve superior-quality results}High-quality textiles with superb colour and clarity can be created quickly thanks to Epson's PrecisionCore technology and two TFP printheads. These work in tandem with a new high-density HDK Black ink, the latest addition to the UltraChrome DS ink range, which has been developed for use in textile printing to produce deep, neutral blacks and dense shadows.{bEnsure high productivity}Users will benefit from two high-capacity ink supply systems meaning longer, uninterrupted print runs and less time spent replenishing inks. Additionally, a large after heater and optional air dryer means products are in optimal condition for winding on to the highly-accurate take-up system.{bCut costs}Epson realises how important it is to keep overall printing costs down and with Epson UltraChrome inks, it is easy to achieve a very low cost per square metre. To help offer businesses significant cost savings, the SC-F9200 is available with Print & Save¹, Epson's professional managed print service package, which allows tighter budget control and helps reduce overstocking.{bExceptional service and support}The SC-F9200 comes with a one year warranty as standard with the option to extend further with Epson CoverPlus warranty options. These options include an Epson rolling one-year warranty, meaning customers can pay for a year at a time and don't have to pay for a long term upfront.

KEY FEATURES

- **Dual PrecisionCore TFP printheads**
Quickly create high-quality textiles with superb colour and clarity
- **High-density HDK Black ink**
Produce deep, neutral blacks and dense shadows and reduce overall ink consumption¹
- **Complete Epson package**
Ensure every element works together to deliver the best possible results
- **High-capacity ink tanks**
Means a low TCO and low cost per square metre
- **Added peace of mind**
One year warranty as standard. Extended CoverPlus warranty options also available
