WorkForce Enterprise WF-M21000 D4TW

DATASHEET / BROCHURE

WorkForce Enterprise WF-M21000 D4TW

Best for enterprise teams that need 100 ppm mono output with low energy use and minimal consumable replacements.

Superior quality at high speeds.

The WorkForce Enterprise WF-M21000 delivers superior image quality at print speeds of up to 100ppm and a fast first copy out time (FCOT) of 4.9 seconds[3].

Super high ink yield.

Print up to 120,000 in mono without changing the ink supplies.[1] This means there is even less need for user intervention. Through fewer consumables and supplies, it also produces less packaging. With ultra-low power consumption, the overall environmental impact of printing is cut dramatically. Robust, high-end finishing capability.

With advanced finishing such as booklet finisher and hole punch options, this device offers advanced finishing capability. It also offers a high paper capacity of up to 5,350 pages, increasing productivity further. Heat-Free technology.

Epson Heat-Free PrecisionCore Technology requires no heat to warm up when it is switched on or awoken from sleep, which significantly reduces energy consumption. This allows Epson's Heat-Free inkjets to deliver a fast FCOT compared to laser technology.

Advanced software solution compatibility.

A variety of software solutions can be integrated into existing IT infrastructure to improve efficiency. This includes Epson's Epson Remote Services (ERS) which offers cloud-based device monitoring and management system that delivers advanced remote diagnostics for Epson business products.
