CW-C8000e (bk)

CW-C8000e (bk)

Best for manufacturers and warehouses that need high-volume, in-house colour label production on demand.

Reliable and consistent results.

The C8000 can help manufacturers produce consistent, high-quality labels in-house and on-demand. The printer features the PrecisionCore printhead to ensure reliable results, while Nozzle Verification Technology (NVT) and dot substitution help prevent misprints and dead pixels.

Fast speeds.

Produce high-quality labels fast, including those for food and beverage products, packaging and boxes, as well as EU Energy Labels and GHS Labels. With print speeds of up to 300mm/sec, you can print labels in full colour at the same speed as some incumbent thermal monochrome printers.

Cost-effective.

Printing labels on-demand helps eliminate costs associated with pre-printing, such as label waste and large label inventory. High-capacity ink pouches offer low cost per print, and the permanent printhead offers significant cost savings, as none of its major components will need replacing for at least 500km worth of printing[1].

Easy to use with minimal maintenance.

With its LCD control panel, set-up is easy. ESC/Label allows integration with virtually any operating system, and a full range of software utilities supports deployment. Extensive connectivity options and cloud printing support enable PC-less configurations.

Flexible.

The C8000 prints on matt and gloss paper, film and synthetic media, supporting print widths from 1 to 4 inches.
