EV-110

Best for experiential displays and digital signage. Versatile 2,200-lumen WXGA laser projector with GPI sensor (white).

The LightScene EV-110 allows users to unlock their creativity and project instantly appealing visuals, with sharp WXGA resolution and 2,200 lumens brightness. Thanks to its discreet design, it can be used where a traditional projector may stand out. A black version is also available.A lightweight, adaptable design means the EV-110 can be installed in a variety of ways, from a traditional ceiling mount to a freestanding floor mount, or attached to a lighting track, including recessed lighting tracks. Featuring a built-in media player with wireless content upload, allowing playlists to be loaded onto an SD card and played directly from the projector[1]. The EV-110 also features HDMI connectivity for simple integration into content management systems without specialist installation. The GPI function supports direct sensor connectivity for creating dynamic experiences that can adapt to situational changes without the need for costly external hardware. The EV-110 also uses advanced techniques such as edge blending to achieve stunning results in larger spaces that require multiple unit installations.A five-year warranty, combined with Epson's reliable laser light source technology and sealed optical engine, means that the EV-110 does not require regular maintenance.
