Replacement

1. Colored yields are extrapolated based on Epson original methodology from the print simulation of Test Patterns provided in ISO/IEC 24712 with replacement sets of ink. Quoted yields are NOT based on ISO/IEC 24711. Quoted yields may vary depending on the mixed yields of your printer and the type of paper you are using, the technology of your printer and the quality of the ink cartridges used. During the manufacturing process, a certain amount of ink is lost due to minor variations in the nozzle size and the ink flow rate. The total ink volume of each cartridge is approximately 80% of the nominal value. The actual yield of each cartridge is approximately 80% of the nominal value. The actual yield of each cartridge is approximately 80% of the nominal value.

2. Based on Epson calculations, average total saving required to print the same number of pages as the average yield of ink bottles included in-box within the EcoTank Mono range. Comparison between average yield (A4 prints) of ISO/IEC 19752 of EcoTank "110" bottle and the genuine consumables sold and used within the 10 best-selling 1-20ppm mono laser printers in Middle East and Africa (IDC, Quarterly Hardcopy Peripherals Tracker, 2019 shipments, published Q1 2020). Total savings calculated with reference to the average purchase price of a printer amongst these top 5 models plus printing costs, calculated by dividing the relevant cartridge sales revenue and total yield by unit sales in Middle East and Africa (IDC, Hardcopy Peripherals Consumables Tracker, 2019 shipments, published H2 2019).
