

SOLUTIONS FOR DIGITAL TEXTILE PRINTING

EPSON®
EXCEED YOUR VISION

DIRECT TEXTILE PRINTING

SPEED MEETS RELIABILITY

Discover the perfect solution for direct printing onto cotton products – t-shirts, cushions, bags and many other items, with our SureColor™ SC-F2000 Series.

High-quality, flexible and economical

Offering great value, this direct textile printer is perfect for producing individual items or small runs – whether you're printing on 100% cotton, or mixed fabrics with at least 50% cotton. What's more, it's easy to operate, so it guarantees seamless production.

The large colour gamut provides more vivid colours, sharp contours and smooth gradations. But the printed area remains soft and flexible, making t-shirts, for example, comfortable and durable.

Black, white or coloured textiles

The printer is available in 4 and 5-colour models and can be used for printing onto black, coloured or white fabric with a thickness of up to 25 mm. The 5-colour model also includes white ink. The maximum print area is 406 mm x 508 mm, (16" x 20").

In the quickest print mode – dual CMYK mode – the SC-F2000 can print a t-shirt in just 27 seconds.¹

All components are developed and produced by us. This ensures quality, performance, reliability and maximum productivity, as well as a reduced total cost of ownership.

INDIRECT TEXTILE PRINTING

EXCEPTIONAL QUALITY, BROAD APPLICATIONS

Our SureColor™ SC-F Series dye-sublimation transfer printers set your creativity free. Produce fashion items, sportswear, home textiles, signage and more with speed, quality and reliability.

High productivity and quality

Achieve outstanding results in record time with this series of printers. Produce small or medium-sized print runs that meet the highest quality requirements for polyester fabric, with no pre-treatment necessary.

High-performance PrecisionCore TFP printheads are at the heart of our printers. They guarantee outstanding quality at fast printing speeds and go perfectly with our UltraChrome DS inks, as well as other inks.

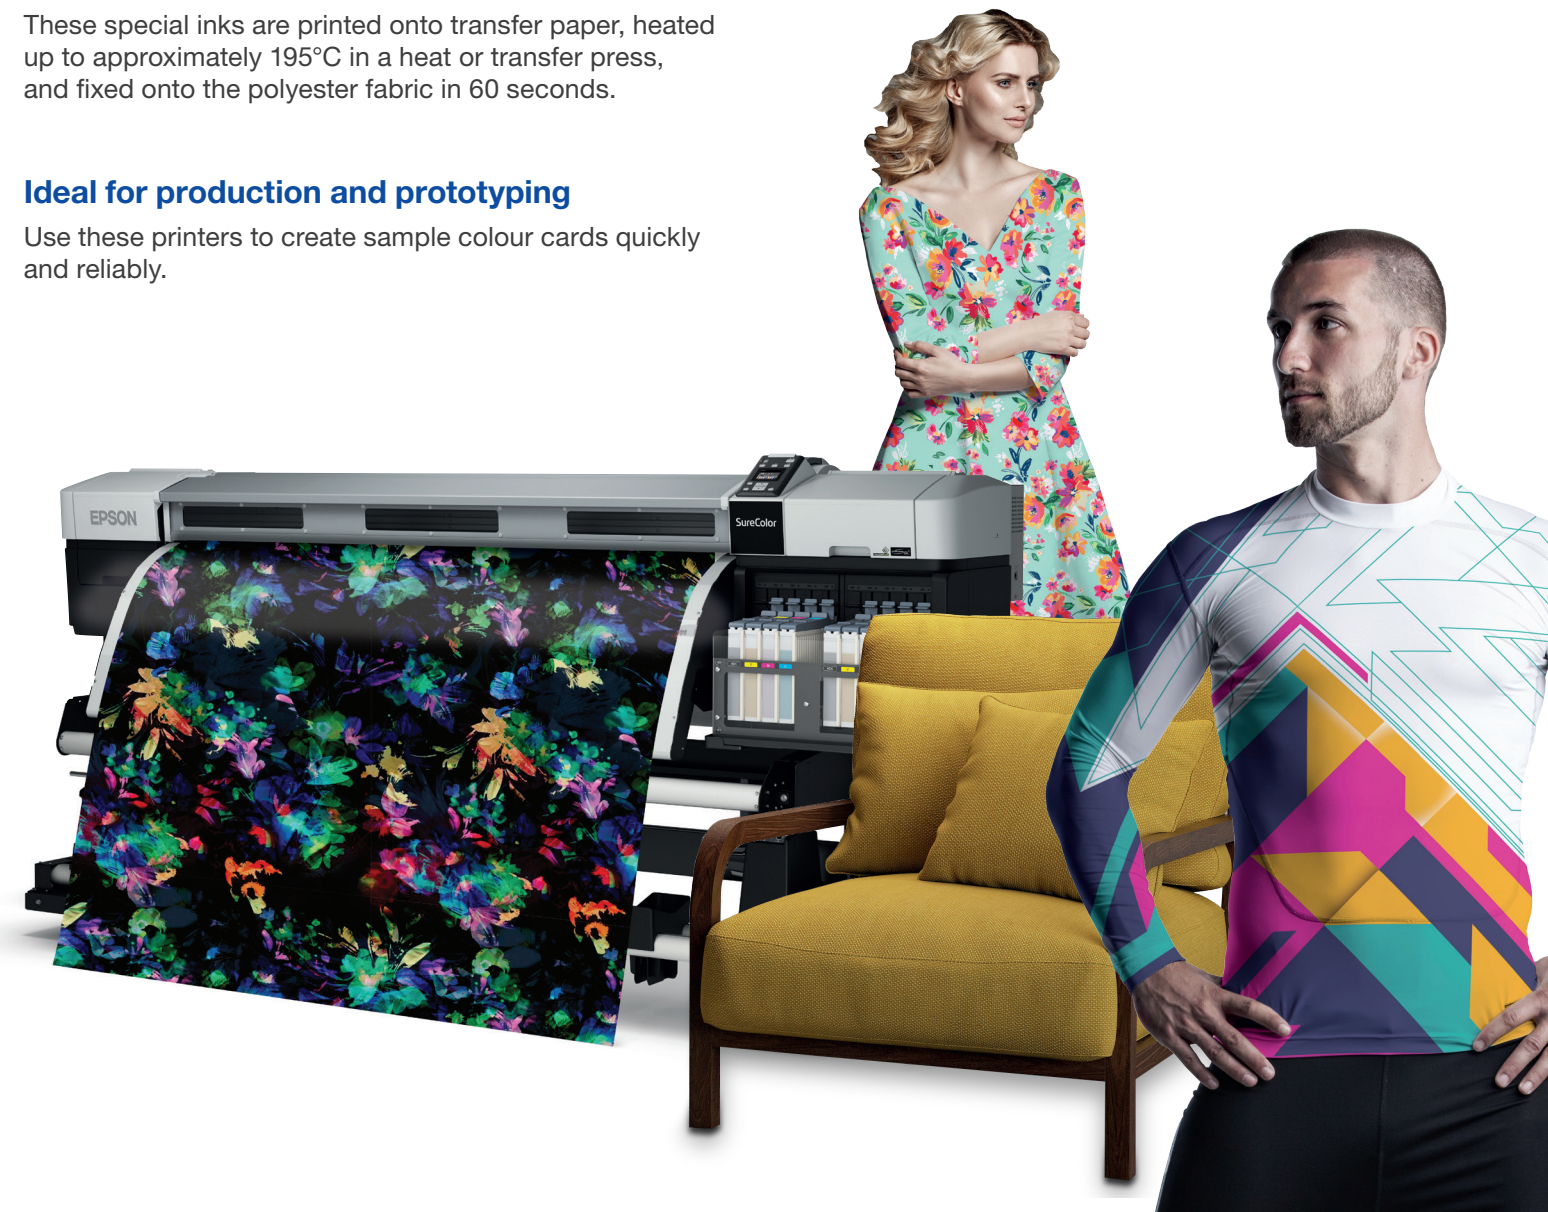

These special inks are printed onto transfer paper, heated up to approximately 195°C in a heat or transfer press, and fixed onto the polyester fabric in 60 seconds.

Ideal for production and prototyping

Use these printers to create sample colour cards quickly and reliably.

Available dye-sublimation transfer printers:

- **Epson SureColor SC-F6200**
44" (111.8 cm), printing speed: up to 63.4 m²/hour
- **Epson SureColor SC-F7200**
64" (162.6 cm), printing speed: up to 58.9 m²/hour
- **Epson SureColor SC-F9200**
64" (162.6 cm), printing speed: up to 100 m²/hour

INDUSTRIAL TEXTILE PRINTING

THE TOTAL SOLUTION FOR HIGH QUALITY FABRICS

In 2003, Epson formed a partnership with F.lli Robustelli and For.Tex – both part of the Como textile district in Italy – to create the Monna Lisa range. Monna Lisa is an industrial digital printing system for silk, wool, cotton, viscose, linen, polyester, polyamide and various blends.

To exceed the needs of the high fashion, clothing and textile markets, the expertise of each company has come together to create a total solution that enables users to achieve high quality results that don't impact productivity.

TEXTILE PRODUCTION CHAIN

RELIABLE COLOUR MATCHING

Binding digital proof

Epson solutions allow you to speed up the matching process from design to production. Our large-format printers deliver high-quality, colour-binding reference prints or 'digital proofs', for effective colour matching.

Globally reproducible

Whether a file is printed in a European creative hub, or at a production site in Asia, your designs can be reproduced at any time and anywhere.

Colours are communicated precisely and securely to significantly shorten the matching process and reduce costs.

Choose the right product

We have several printers available that help speed up the matching process. These include:

- Epson Stylus Pro 4900 – 17" (43.18 cm)
- Epson SureColor SC-P6000/SC-P7000 – 24" (61 cm)
- Epson SureColor SC-P8000/SC-P9000 – 44" (111.8 cm)

The colour solution.

**Better Products
for a Better Future**

¹ When using dual colour mode; only applicable to white T-shirts.

SureColor SC-F series printers are certified in accordance with Oeko-Tex Standard 100 for human ecology requirements for class I products for teenagers, children and babies and toddlers aged up to 36 months. Oeko-Tex Standard 100 determines the test criteria for harmful substances in textiles. This standard is issued by the International Association for Research and Testing in the Field of Textile Ecology (Oeko-Tex).
