SureColor SC-F3000

DATASHEET / BROCHURE

SureColor SC-F3000

Best for garment decorators who need versatile direct-to-garment and DTFilm printing in a compact footprint.

Enhanced productivity.

To complement the intuitive, highly-durable design, Epson has introduced elements to keep businesses running more efficiently. The auto platen gap adjustment feature detects surface height and allows for easy switching between garments of different thicknesses. The 1.5-litre bulk ink solution makes reloading and resetting ink a quick and easy job. Also, Epson's Production Monitor software provides ongoing printer status information on smart devices and PCs; this along with two user-replaceable PrecisionCore MicroTFP printheads, help improve uptime.

Quality through innovation.

Innovative technology helps to simplify production and increase quality levels. Ink droplet placement results in more stable and accurate printing and Nozzle Verification Technology (NVT) automatically checks whether all nozzles are firing accurately and intuitively compensates to ensure that high-quality printing is maintained.

Built for reliability.

Various integrated auto-maintenance features, such as the new wiper kit, the larger dust catcher and auto cap cleaning, help to reduce manual intervention. Eco-friendly printing.

The inks meet the Global Organic Textile Standard (GOTS) and you're ensured that you can comply with the Oeko-Tex Standard 100 for high-standard safety ecological textiles[1].

KEY FEATURES

- **Bulk ink solution**
  Compact 1.5-litre ink pouches
- **Auto platen gap adjustment**
  Sensors to automatically detect garment surface height, for easy switching
- **Garment Creator software**
  For simple set up and quick production of personalised designs
- **Easy to use**
  User-friendly design with highly-intuitive 4.3-inch touchscreen
- **The complete solution**
  Includes printer, printhead, software and inks
