ColorWorks C7500

DATASHEET / BROCHURE

ColorWorks C7500

Best for manufacturers and warehouses that need high-volume, in-house colour label production on demand.

Reliable and consistent results.

The C7500 can help manufacturers produce consistent, high-quality labels in-house and on-demand. The printer features the new PrecisionCore printhead to ensure reliable, high-quality results. Our unique Nozzle Verification Technology (NVT) and dot substitution help prevent misprints and dead pixels.

Fast speeds.

Produce a range of high-quality labels fast, including those for food and beverage products, packaging and boxes, as well as EU Energy Labels and GHS Labels. With print speeds of up to 300mm/sec, you can now print labels in full colour, at the same speed as some incumbent thermal monochrome printers.

Cost-effective.

Printing labels on-demand helps eliminate costs associated with pre-printing, such as label waste and large label inventory. High-capacity, individual ink cartridges mean only the colour used will need to be replaced, offering very low cost per print. The permanent printhead offers significant cost savings, as none of its major components will need replacing for at least 500km worth of printing[1].

Easy to use with minimal maintenance.

With its LCD control panel, set-up is easy. Our newest printer command set, ESC/Label, allows integration with virtually any operating system. The device also comes with a full range of software utilities to support printer deployment. NVT also helps to prevent clogged nozzles.

KEY FEATURES

- **Excellent reliability & endurance**
  PrecisionCore printhead for consistent results and long printer lifetime
- **Save time & money**
  Streamline label production by printing your colour labels on-demand
- **High speed & high print quality**
  Print speeds of up to 300mm/sec at image resolution of 600x1200dpi
- **Low maintenance, reduced downtime**
  Permanent printhead and NVT for self-maintenance
- **Easy integration**
  New ESC/Label programming language for integration with virtually any OS
