

TM-C3400BK (132) - LAN

KEY FEATURES

- **חיסכון במקום**
עיצוב קומפקטי עם הפעלה חזיתית
- **הדפסה עמידה**
דיו עמיד בפני כתמים / דהייה / מים
- **פרטיות נתונים**
אין תמונת מראה על הסרט המשמש
- **אמינות**
טכנולוגיית AID לבדיקת פתחי הזרקת הדיו
- **מהירות**
הדפסה במהירות של עד 92 מ"מ/שנייה

On demand inkjet labels for patient wristbands, tickets, passes and retail promotions

Monochrome bar codes, identification labels, tags and tickets can be printed with the Epson TM-C3400BK, a high-performance inkjet label printer. As all functions, including replacement of the high-capacity ink cartridge and paper rolls, are positioned at the front of the unit, the TM-C3400BK is designed not only to be space-saving, but also to allow installation on a shelf or under a counter. Reliability and data privacy By using inkjet technology rather than thermal transfer, the TM-C3400BK doesn't leave a mirror image of the printout on the thermal transfer ribbon, improving security for applications where data privacy is critical, such as healthcare or government institutions. To ensure the print quality of barcodes and prevent misprints and dead pixels, the TM-C3400BK uses Epson's automatic nozzle checking technology (AID), which senses nozzle clogs and fixes them before the label is printed. Durable prints Compatible with a wide range of plain and matte coated media between 30 and 112mm wide, the TM-C3400BK uses Epson DURABrite Ultra Pigment ink to provide durable prints that resist smudging, fading, water and most other liquids, and can survive demanding storage conditions. As prints last for years, even in direct sunlight, the TM-C3400BK is ideal for use in data critical applications, such as in laboratories or logistics. Speed and print quality With a print speed of up to 92mm/sec and an integrated auto-cutter, the TM-C3400BK can print up to 100 labels in under three minutes. Additionally, print quality is higher due to greyscale printing capability. Easy integration Using the Epson printer driver interface software and an included Windows driver, the TM-C3400BK can be easily integrated and controlled directly from within applications.
